

Tools for Mindfulness

(generously & anonymously contributed to *Peace Day Philly* by a mindfulness practitioner)

Mindful Breathing

Our breathing is a stable solid ground that we can take refuge in. Regardless of our internal weather- our thoughts, emotions and perceptions- our breathing is always with us like a faithful friend. Whenever we feel carried away, or sunk in a deep emotion, or scattered in worries and projects, we return to our breathing to collect and anchor our mind. We feel the flow of air coming in and going out of our nose. We feel how lightly and naturally, how calmly and peacefully our breathing functions. At any time, while we are walking, driving, or working, we can return to this peaceful source of life. We may like to recite silently to ourselves,

Breathing in I know that I am breathing in.

Breathing out I know that I am breathing out.

We do not need to control our breath. We can just enjoy feeling the breath as it actually is. It may be long or short, deep or shallow. In time, with our awareness it will naturally become slower and deeper. Conscious breathing is the key to uniting body and mind and bringing the energy of mindfulness and peace into each moment of our life.

Bells of Mindfulness:

When we hear the sound of a bell (it may be a church bell, the chiming of a clock, or even the ringing of the telephone or honking of a car horn) we are invited to stop and come back to our breathing. If we are talking, or working, we stop. We relax our body and our mind. We let go for this moment of whatever we may be thinking and simply enjoy three full, natural breaths. We do this joyfully, easily, without any need for stiffness or formality. This moment is a gift: an invitation to come home to ourselves and touch the ease and peace that are always available within.

We may like to say silently to ourselves this little poem:

*Listen, listen,
this wonderful sound
brings me back
to my true home.*

By stopping to breathe and restore our calm and our peace, our work becomes more enjoyable and the friend in front of us becomes more real. With just three conscious breaths we can release the tensions in our body and mind. We return to a cool, clear state of being. We become free.

<http://www.mindfulnessdc.org/bell/index.html>

Free Mindfulness bell available online with no download can be set for selected intervals to help us remember to stop during work on our computer (or whatever we may be doing).

<https://www.stillnessbuddy.com/>

“Stillness Buddy” is a powerful mindfulness application that works by displaying on your desktop screen, short "moments of stillness" and longer "mindfulness pauses", spread out during the day. These breaks are very brief so they don't interfere with your work. You choose their duration and frequency to suit your preferences. You can also pause the application for a while if you need to.” Several versions to choose from, including one grounded in and helping to support the work of Thich Nhat Hanh.
